Kirk Tree Tie Plastic Netting

The Shape

that protects Christmas trees against costly damage from field to the retail lot to the customer.

The Shape

of a time-tested product of proven quality, doesn't zipper or come apart.

The Shape

that remains pliant in any temperature or weather.

The Shape

that's faster in the field in any kind of weather and eliminates hand tying labor.

CARTRIDGES AND ROLL STOCK

Balers From Kirk 18" and 20"

We have done wondrous things to this already proven baler. We have reduced the bell size — this makes it more efficient and easier to pull trees through. We have reduced the weight and, at the same time, improved its strength. While these two improvements work toward a stronger, more efficient baler, they also allow less shipping weight, thus cutting your freight cost and delivery time. One of the most important new features is the finish inside and out. A brand new, hard-as-glass finish that cuts the friction, so that all trees pull through easier. Better looks, lightweight, better efficiency, stronger, and perhaps most importantly, a better baler at the same price.

Christmas Tree Colorants

Needlehold

Needlehold is a liquid-hydrostatic sticker that when diluted with water and sprayed on spruce trees forms a colorless-durable film that helps prevent water loss through transpiration. Needlehold is not toxic to trees and will not deter future growth if the trees are sprayed in the field and left uncut.

Dilute one gallon of Needlehold with two gallons of water and spray the trees thoroughly. This application should be made in the field before cutting. Needlehold for needle retention should be sprayed in temperatures over 40° F. Do not spray if trees are wet or if frost remains on the trees.

See label for more detailed directions about dilutions, spraying, precautions, spraying equipment, clean-up, and directions for transplants, shade trees, shrubs, etc.

SOLD IN 5-GALLON CONTAINERS AND PRICED BY THE GALLON.
ITEM NO. 506

Super Pinegreen

Super Pinegreen is a richer Pinegreen colorant and is what the name implies a Super Pinegreen. Super Pinegreen is an easy-to-spray water soluble, concentrated green colorant that when mixed with water and sprayed on Christmas Trees will produce an attractive natural green to trees that are subject to discoloration.

After the spray dries, the tree is coated with a colorfast film that will not wash off, wear off or fade in sunlight, and is harmless to trees. It is safe to use, and after it is applied presents no hazard to children or pets.

Dilution of one gallon of Super Pinegreen in 30 gallons of water has proven satisfactory; however, this may be altered to gain the intensity of green coloration desired by the user. Early application is recommended while the trees are still green in the field, and before any danger of frost or yellowing.

SOLD IN 5-GALLON CONTAINERS AND PRICED BY THE GALLON.
ITEM NO. 504

tree life Christmas Tree preservative by Christmas Tree People

Tree Life is a scientifically formulated product which extends the life and beauty of Christmas trees. Simply mix with tap water.

COMES IN TWO PACKS.
ITEM 600 — 100 pk/cs
ITEM 602 — 250 pk/cs

Association Affairs and History

The La.-Ms. Christmas Tree Association was officially organized as the La.-Ms. Christmas Tree Growers' Association in December, 1976 in Jackson, Ms. from a group of 17 growers. A prior meeting was held on the LSU campus in Baton Rouge to discuss the need for an association and the latest cultural practice recommendations. Our Association has grown from 17 members in 1976 to over 600 in 1985. We are the third largest Christmas tree association in the Nation.

Our Association was granted a Mississippi Charter of Incorporation as an agricultural association with 25 charter members in late December, 1976; and a Louisiana Charter in April, 1977. The first annual meeting was held September 17, 1977, in Hattiesburg, Ms., with approximately 93 people attending. The Eighth Annual Meeting was held September 22-23, 1984, in Hammond, LA, with approximately 300 in attendance. Fritz G. Lindley was the first president of our Association (1976-77) and he has been succeeded by Edward L. Blake (1978-79), Robert N. Eddy, Jr. (1980-81), Wallace Swedenburg (1982-83), and James J. King (1984-present).

The La.-Ms. Christmas Tree Association (the word Growers' removed by referendum in 1983) is composed of individual growers, wholesale and retail buyers, equipment and chemical suppliers, and many other associated business people. In case you're wondering about the annual meeting schedule, our annual meetings are hosted by Louisiana in even-numbered years and by Mississippi in odd-numbered years.

Your Association is now a growing business with an executive secretary and a business office to serve your needs. The Business Office was officially established on July 1, 1981, by vote of the Board of Directors. The duties and responsibilities of the Business Office are contained in a legal contract that is renewed and negotiated on an annual basis. Resource Consulting International, Ltd. of Starkville, Ms., provides all office space, equipment, and staff and is paid on a per-member basis. Association affairs have increased to the point that we must keep all membership, accounting, and seedling order records on a microcomputer. If you are in the Starkville area, come by and see the operation of your Business Office.

As you can see from the 1985 Budget your Association is a small corporation with lots of expenses and only a limited amount of income. Your \$20 membership provides the majority of the income to run the Business Office and provide member services. I realize that you would like to have more services, especially in the area of marketing and promoting local grown trees, but these activities take more money than we can generate with a \$20 membership. Please let your Board of Directors know the types of services you would like the Association to offer. For your information, our membership dues are the lowest of any association in the Nation.

The Business Office is open Monday-Friday from 7:30 a.m. to 5:00 p.m. to provide you with assistance and information. As most of you know, my wife Kathie maintains the Association records and conducts most of the daily business activities. She is the executive secretary to the executive secretary, so don't hesitate to communicate with her.

Don't forget that your County Agent is a valuable source of assistance and information. He has the backup

of Extension Specialist at LSU and MSU.

Please let me or your Board know how we can better serve your needs. Relax and enjoy the Annual Meeting . . . don't forget to learn something during the meeting.

Dr. Robert C. Parker
Executive Secretary

1985 BUDGET

SOURCE OF INCOME/COST	1985 BUDGET
INCOMES:	
Membership Dues	\$12,000.00
Seedling Sales	34,750.00
Annual Meeting Receipts	8,000.00

You Cannot Afford To Be Without the **Yule Trimmer**

Efficient — Easy to operate
Trims 5-8 trees per minute
2000-3000 trees per day is normal
Price of \$3750. With these trim rates
gives lowest cost per tree,
Self propelled-adjustable speed
Not affected by uneven or hilly ground
One wheel balanced design utilizes its
walk behind feature and maneuverability
to give the finest precision shearing. Up
hill and down it maintains the same cut-
ting angle and steady non-stop rate
You walk at slow 2 mph pace applying
very little force to guide trimmer
4-cycle gasoline engine
Dependable belt driven rotary cutters
Trims up to 8 ft. trees
Belts and cutters shielded from operator
Safety shut-off grip on right handle-bar
Low maintenance design shears more
trees week after week
The thin high speed Swedish steel blades
give clean cuts to promote maximum
budding

The Yule Trimmer is bought for its productivity and labor saving but owners find that the improved quality of their trees is of even greater importance.

YULE FOREST

1220 Millers Mill Road
Stockbridge, GA 30281
404-957-3165

STANDING ASSOCIATION COMMITTEES 1985

FINANCIAL/BUDGET COMMITTEE: Bill Pippin – 318-322-0651, Co: Barton Bennett – 504-927-3500

1. Direct formulation of budget items in response to Association objectives/programs.
2. Initiate and/or direct ways of obtaining money for budget items.
3. Monitor financial activities of Association.
4. Approval of non-budget expenses.
5. Annual audit of Business office records.

PROJECT and ACTIVITIES COMMITTEE: Alden Main – 504-388-4087

1. Establish priorities for annual projects and activities.
2. Establish long term activities/projects.
3. Obtain needs and priorities of members.
4. Appoint and supervise activities of needed committees.

ANNUAL MEETING COMMITTEE: Harry May – 601-485-9523

1. Plan annual meeting activities.
2. Appoint and supervise committees.

RESEARCH and DEVELOPMENT COMMITTEE: Alden Main – 504-388-4087, Co: Bill Elam – 601-325-2946
Co: Dr. Tony Hu – 504-388-4131

1. Promote research.
2. Monitor new research results.

PUBLICITY/PROMOTION COMMITTEE: Bob Eddy – 601-255-1857

1. Develop and conduct programs to promote natural Christmas Trees.
2. Advertise and publicize programs of the Association.
3. Arrange and publicize placement of local trees in public places (Governor's Office, etc.)

SEEDLING SALES COMMITTEE: Business Office – 601-323-3896

1. Locate and purchase annual seedlings.
2. Develop long range plans to meet seedling demands of Association.
3. Coordinate and supervise disbursement of annual purchase.
4. Work with public and private organizations to develop long range sources.
5. Seed source development.

GRADING/MARKETING COMMITTEE: Craig Collier – 504-246-3994, Co: Tom Gould – 601-788-9742

1. Develop guidelines/standards for Association involvement in market and grading.
2. Initiate specific activities to serve needs of members.
3. Establish a grievance and arbitration committee to work with buyer and seller in case of a disagreement.
4. Provide growers/sellers with sample contracts and guidelines.
5. Maintain information about buyers and sellers credibility; records of transactions results only – release by one party only.

MEMBER SERVICES COMMITTEE: Norm Katz – 504-839-5243

1. Define type and scope of member services.
2. Establish dues structure.
3. Establish equipment needs, etc.
4. Newsletter

LEGISLATIVE AFFAIRS COMMITTEE: Reggie Pulliman – 504-925-2837

1. Monitor tax laws/legislation.
2. Develop programs/activities to promote appropriate legislation at State and National levels.
3. Monitor regulation/laws that affect our industry.

SUGGESTED IMPLEMENTATION:

1. Appoint committee to define committee structure, functions, inter-relationships.
2. Report to Board for approval.
3. Once implemented, a Board Meeting would consist of committee reports.
4. A Committee would then conduct their respective functions as approved by the Board.

Custom Christmas Tree Shearing

National Christmas Tree Trimmers provides growers with quality custom tree shearing.

Their procedures are proven and produce trees with a handsome, more appealing appearance. Experienced NCT trimmers first complete detail work at the tree top and then shear with the new SAJE Shear. The result is a sharper taper which makes the tree more appealing.

Prices are very competitive and references are available on request.

LET THE CRAFTSMEN OF
NATIONAL CHRISTMAS TREE TRIMMERS
PROVE THEIR VALUE TO YOU

SAMPLE BALLOT

1986 Officers, 1986-88 Directors

OFFICERS

President:

____ Barton Bennett — Baton Rouge, LA
President of Bennett and Peters, Inc.; on Board since 1982; grows trees personally and manages tree farm for his company; member since 1978.

Vice-President:

____ Harry May — Chunky, MS
Recruiting Office Manager, MS Air National Guard. Member since 1979; on Board since 1982; Owns Lazy Acres Christmas Tree farm with Shirley. 1985 Annual Meeting Chairman.

DIRECTORS

Louisiana (Select 2)

____ Clarke Gernon — New Orleans
Owner of Shady Pond Tree Farm, a member since 1980.

____ Rudy Sparks — Patterson
Manager of two farms for Williams, Inc. of New Orleans; one in Louisiana and one in Mississippi.

____ Kevin Steele — Angie, LA
Member since 1981; 3rd place winner in 1984; Owns Steele's Tree Plantation.

____ Alton Sullivan — Denham Springs, LA
Member since 1981

Mississippi (Select 2)

____ Jack Fowler — Vicksburg, MS
Member since 1980.

____ Walt Hylander — Lorman, MS
Member since 1980. Owns Rosswood Plantation.

____ Richard Miller — Biloxi, MS
Member since 1981. Owns Honey Green Acres farm.

____ George Stone — Chatham, MS
Member since 1981. Owns Pappaw's Tree Forest.

Christmas Wreath & Garland Machine

Proven & Improved Since 1959 ...

Are You Still Producing Wreaths Using The Old Expensive Clamp on Type Wreath Rings?

If so, save 50% to 80% on your wreath ring costs, using the Evergreen Wreath and Garland Machine.

Due to the rapidly increasing demand for quality wreaths and roping, this machine was designed to produce both items rapidly and inexpensively without losing the quality of the slow hand-wrapped method.

This is not a staple or clip type machine, therefore no special expensive wreath rings are needed. To produce a quality wreath, boughs are wire wrapped onto an inexpensive continuous ring from ten inches to ten feet in diameter.

To produce roping, the boughs are wire wrapped to a twine or wire core.

This fast, inexpensive method enables you to be competitive in all areas of price and quality.

ORDER TODAY ... Have the time you'll need to make plans for your share of the profits from this constant growing market ... Here's a real money-maker for Flower Shops, Garden Centers, Boys Clubs, and Civic Organizations ... Ideal for Cities and Shopping Centers where extensive Holiday trimmings call for hundreds of yards of Garland and Wreath.

The "No Problem" Christmas Tree Stands

At Gunnard Company we think too much effort goes into selling a fresh Christmas tree to have it dry out and turn brown after a few days in a home. That's why we invented the 4-Brace tree stand. The 4-Brace is designed to keep trees as fresh and green as possible. And if a tree's life can be extended by two to four weeks it reflects on you.

The 4-Brace accommodates any

size tree up to six inches in diameter, whether it's straight or crooked and without removing any lower branches. The base is a galvanized steel pan holding over two gallons of water, eliminating constant checking.

The Gunnard Company is the world's largest manufacturer of commercial tree stands and makes the best home stand available.
